THE SOLANA DIVIDEND DOG

**ROADMAP · The Road of the Dividend Dog**

# Why Drippy Exists

**MAC**

**TEAM LEADER · DEVELOPER**

@MacIsBullish

*Husband. Father. Dev. Team leader.  
"I love what I do."*

***Drippy wasn't created to become another memecoin.***

**It was created to prove that a crypto community can reward loyalty, build real products, grow together, and give back along the way.**

***We believe community is stronger than hype.***

That belief is why everything in this roadmap exists — the engine that pays holders every half hour, the burns made at real market caps, the games, the quests, and the giving still to come. Built in the open. Led by a real person who answers to the pack every day.

- *More of the pack — builders, artists, moderators — will be introduced here as they step forward.*

# How The Drip Works

**1 5%**

## BUY & SELL TAX

Every buy and every sell pays a 5% tax. No exceptions, no exempt wallets. The tax is the lifeblood of the pool.

**2 100%**

## CONVERTED TO SOL

All of it is converted to SOL automatically by the contract. No team skim. No multisig delays. Just liquid SOL piling up for the pack.

**3 30:00**

## RAINS EVERY 30 MIN

The pool sends SOL directly to holder wallets every half hour. No claiming. No gas. No hassle. Sleep, scroll, get paid.

## BURN FOR GLORY. GET PAID FOREVER.

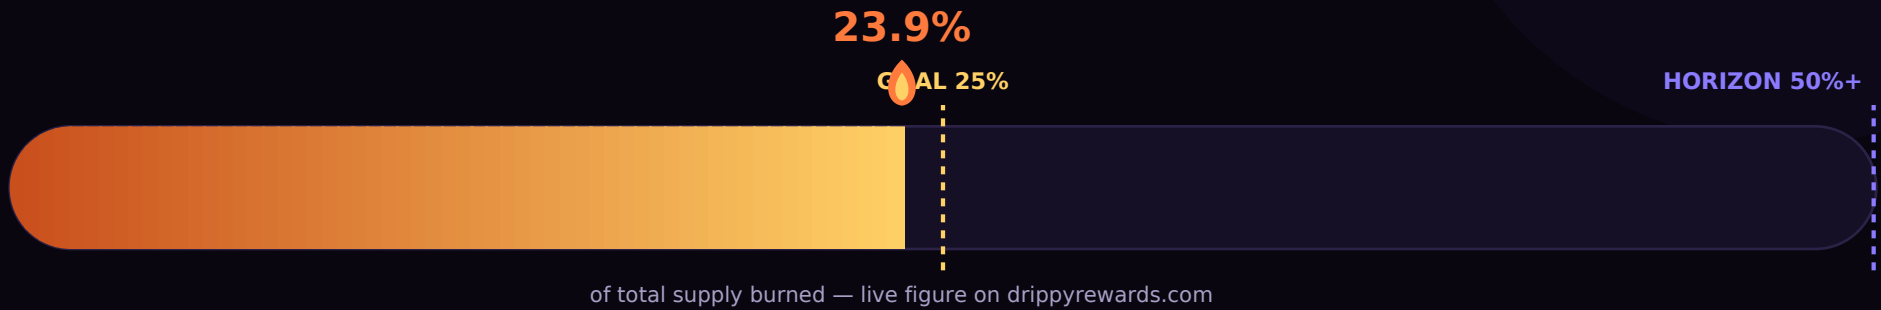

Burn any amount of \$DRIPPY and earn 2x rewards on the burned amount for life — even at zero balance.

## HOW TO READ THIS ROADMAP

This is a living document. The pack builds in the open, ships what it promises, and adjusts as the market and community evolve. Future items represent direction, not deadlines — sequence matters more than schedule. What's marked complete is complete, verifiable on-chain, and already working for holders today.

***Accountability. Collaboration. Honesty. That's what moves the pack forward.***

# The Burn Record

Not burned at launch. Burned at real market caps, with real money, by a pack that means it. In roughly two months, the community has voluntarily destroyed nearly a quarter of total supply — progressively, at meaningful valuations, representing serious committed value. One of the most aggressive community burn records on Solana.

## SUPPLY

Only goes down. No mint authority in operation.

## 2X FOREVER

Every burner earns double weight on the burned amount, for life.

## ON-CHAIN

Every burn event recorded, ranked in the Hall of Flame.

# Four Phases of the Pack
